

FOR IMMEDIATE RELEASE

NEW ISO 9001:2008 CERTIFICATION AWARDED TO EMT

BLOOMINGDALE, IL, 06/22/10: Quality is serious business at Elite Manufacturing Technologies. Demonstrating its desire to keep abreast of the latest industry certifications, the Company was awarded its ISO 9001:2008 certification in early June. "The 2008 standard has important modifications from the 2000 version," comments Director of Quality, Rahul Sarkar. "The new standard incorporates some specific clarifications and elaborations that effectively remove ambiguities of the old standard."

The most significant change realized at EMT was in the area of process monitoring and measurement. The new standard requires members to consider the impact that each process has on the overall Quality Management system effectiveness and on the Company's ability to meet product requirements. Jim Fitch, General Manager, states "it is vital that we measure what is truly important for improvement, and not just the processes that are easy to measure. Measurements need to be specific and focused in order to yield the maximum impact on our systems."

According to the International Organization for Standardization's website (www.iso.org), the purpose of standards is to:

- make the development, manufacturing and supply of products and services more efficient, safer and cleaner.
- facilitate trade between countries and make it fairer.
- provide governments with a technical base for health, safety and environmental legislation, and conformity assessment.
- share technological advances and good management practice.
- disseminate innovation.
- safeguard consumers, and users in general, of products and services.
- make life simpler by providing solutions to common problems.

Standards have positive benefits for businesses, innovators, customers, and consumers. From developing conformity in products and services that meet internationally accepted standards to assuring a clean, safe working environment, ISO standards help businesses compete in markets around the world.

About the company:

Elite Manufacturing Technologies is a leading, innovative manufacturer of precision sheet metal fabricated components and assemblies. Established in 1991, Elite Manufacturing Technologies operates its main manufacturing campus in Bloomington, Illinois. Secondary operations, from simple finishes to complex electro-mechanical assemblies, are managed at an additional facility, conveniently located just minutes away.

EMT's primary focus is to build a total solution for its customers, providing products that are superior in quality and design, competitively priced, and delivered on-time. The Company's entire manufacturing process is ISO 9001:2000 Certified, ensuring a consistently high level of quality in business practices and manufacturing operations.
