

Services

Production:

Elite Manufacturing Technologies, Inc. is your resource for metal fabrications and assemblies. Our manufacturing capabilities range from prototyping to high volume production runs. We invest our time in learning about our clients' products and seek ways to help them drive their business to higher levels of success. From reducing costs through design engineering to inventory stocking programs, EMT continually finds ways to help our customers.

Engineering:

Elite Manufacturing Technologies' team of professional engineers is ready to assist clients with custom design needs. Whether working from established drawings or creating a new design, our engineering team partners with you on an individual level to ensure complete satisfaction with your product.

Assembly:

From a simple to complex electro-mechanical assemblies with integrated control circuits, EMT can manage your project from start to finish. Take advantage of EMT's low rates for assembly--when compared to their own in-house operations, clients often find that reducing their own labor cost and processing time is a distinct business advantage.

Inventory:

EMT keeps a large supply of raw materials on-site and in stock for our customers' immediate use. With material at hand, we can respond to our customers' needs quickly and reduce the front-end production cycle time.

Finishing:

EMT has in-house finishing capabilities including batch and conveyorized powderpaint lines and a silkscreening "clean room". Additionally, we offer wet paint, plating, anodizing, electro-polishing, e-coating, and other custom finishing options for our clients.

Quality Assurance:

To ensure that our company maintains a high level of quality in our business and manufacturing operations, EMT achieved ISO 9000:2001 certification. Investing in its Quality Assurance capabilities, our products are manufactured with consistent quality.

Delivery:

We do not rest until our customers' products are delivered where and when they are needed. EMT owns and operates a private fleet of trucks which can be dispatched quickly for local customer deliveries. For non-local deliveries, we can coordinate logistics for clients' shipments through our national carrier relationships or work with customer-designated carriers.

Precision Sheet Metal Fabrication, Manufacturing, and Assembly

Your *TOTAL* Production Resource

EMT secures all the key functionality and equipment necessary to provide products that meet *and exceed* our customers' specifications.

Elite Manufacturing Technologies, Inc. (EMT) is a leading, innovative manufacturer of precision sheet metal fabricated components and assemblies. From product design to finishing and final assembly, EMT is your one-stop solution for metal fabrication and production.

EMT's primary focus is to build a **total solution** for our customers, providing products that are superior in quality and design, competitively priced, and delivered on-time. EMT's entire manufacturing process is ISO 9001:2000 Certified, ensuring that we maintain a consistently high level of quality in our business practices and manufacturing operations. With operational facilities strategically located in the Midwest and West, EMT and EMT West can serve our regional clients swiftly, while optimizing supply chain channels.

Products

Elite Manufacturing Technologies, Inc...

...the one-stop solution for all your manufacturing needs.

From concept design to final electro-mechanical assembly, EMT supports all aspects of production. We offer custom solutions that meet the unique requirements of our clients. At EMT, we understand the need for timely, high-quality products--and we stand ready to assist our customers with all the resources necessary to achieve success.

Industries Served: Elite Manufacturing Technologies partners with customers from a wide variety of industries including the electronic, telecom, industrial, medical, gaming and recreational/sporting industries.

Products: As a contract manufacturer, our products are custom-made to meet the exact requirements of our clients. EMT is ready to tackle your most challenging projects. A sampling of our products include:

- Custom metal fabricated parts
- Electronic component housings
- Medical equipment components
- Gaming/Amusement equipment
- Electro-mechanical assemblies
- Military equipment

Nothing leaves our warehouse until it is inspected and verified against technical specifications. We invest greatly in our Quality Assurance Department's capabilities to confirm that our products are manufactured with consistent quality throughout the production process.
